

**Integrated Needs Analysis**

individual	household	village / neighborhood	town / city / municipality	region	country	world
------------	-----------	------------------------	----------------------------	--------	---------	-------

- injury
- illness
- thirst
- hunger
- too cold
- too hot

resilience gap

toilets	sewer system	sewage plants
water supply	water mains	water processing

food supply chain	retailer logistics	bulk logistics	imports	intl markets
-------------------	--------------------	----------------	---------	--------------

heating	local grid	power plants	national grid	fuel imports	intl markets
---------	------------	--------------	---------------	--------------	--------------

cooling	housing
---------	---------

**not shown**  
power company  
air/ports/harbors

ports / airports    travel / embargos

fuel supply

diesel generators

electricity	cell towers, cables	local hubs	regional hubs	fiber lines	undersea cables
-------------	---------------------	------------	---------------	-------------	-----------------

satcom

sharing	administration	rule of law	jurisdiction
---------	----------------	-------------	--------------

civil

**SCIM:INAM for a typical developed world nation**

**note: the axis are switched from the previous diagram**

rule of law  
cohesion  
consensus

corporate

jurisdiction  
objective facts ("legal facts")

- transport
- space
- communications
- resource control

- shared succession
- shared plan
- shared map

- international recognition
- effective institutions
- citizens list
- territory map
- jurisdiction

consent of governed → legitimacy of state

staff → space, transport, communications, resource control - succession, plan, map → legitimacy of state
