

A **Lean Green Economy** has to bring **statistical process control** to **Consumption and Waste processes**

1980s
Quantitative
Finance
Revolution

1950s
Total Quality Management
Statistical Process Control
Six Sigma

2020s
Gather statistical
insights into
Consumption
patterns.

2020s
Use data to correctly
value and direct
Waste streams into
revenue streams.

The time has come to build a Lean Green Economy

Let's map the loops, then get all the missing data
