Refugee Families

Pick up and go by the most direct route possible to the host family who will receive them

Siting Agreement

A refugee family and a host family are matched based on travel time and shelter resources

Host Families

Volunteer to have a shelter in their back yard and provide other support

Ordinary People

Something happens

Bay Quake: 300,000 homeless

Nuclear Bomb: 5,000,000 homeless

Everybody has to work together

Emergency Housing

The shelter is put up in the agreed location and the refugee family moves in

Situation Normalized

No refugee camps, no Superdome. We did this together. Later people move back home or to new residences

Shelter Materials

Insulation boards: over 10 million per day in the building industry, heavy plus packaging tape

Building Industry

Hexayurt (or other) shelter

A hexayurt is an insulated shelter which is basically a spare bedroom

Shelter Build Teams

5 people can make one shelter in two hours with hand tools

Red Cross, Burners etc.

This is the network. This is the database / GIS. This is the server grid. Without it, there is no plan.
